I would like the opportunity to review council's meetings in the comfort of my home , because I am certainly interested in how the town is operated . I will not attend lengthy town council meetings . I also want to see how my councillor speaks and votes on certain matters , and does this actually mesh with what that person may have told me .

Please take the time to review the proposal, and find out what citizens prefer before canceling the recording of meetings . Written minutes do not convey the messages adequately.

Carolyn Sanford
